

TitanHQ  
SafeTitan

The only behaviour-driven security awareness platform that delivers security and phishing training in real-time.

**SafeTitan delivers Security Awareness Training (SAT) that transforms your staff into a human Firewall creating the strongest line of defence against cyber threats.**

### What's different about SafeTitan Security Awareness Training

Humans are far more vulnerable than technology. That's why cybercriminals are targeting your staff. Today, your employees are frequently exposed to sophisticated phishing and ransomware attacks. Staff members are often regarded as the weakest security link. However, with SafeTitan you can empower your staff to be your greatest security asset by creating a network of human sensors.

SafeTitan's user centric people-first system modifies security training based on individual users' weaknesses and skills for best long-term results. Why just tick a box when you can change your user's behavior and reduce your exposure to risk? TitanHQ enables clients and MSPs to configure their security alerts generated on the network.

For example, an alert is created to tell SafeTitan when a user downloads free software as it's considered risky behaviour by the IT department. Immediately a customized message is sent to the user. This real time response reduces the frequency of alert events over time, a behaviour change has occurred. There is a measurable and significant reduction in the recorded incidents of users triggering that event.

### SAFETITAN – KEY FEATURES

SafeTitan offers a comprehensive range of features:

- Delivering contextual training in real-time. ONLY AVAILABLE FROM SafeTitan
- SafeTitan delivers a real time response to user behaviour - Train employees exactly when they display risky behaviour.

## SAFETITAN'S PHISHING SIMULATION TRAINING (SCHEDULED)

SafeTitan is built for scale and caters for companies of all sizes. Schedule unlimited regular and advanced simulated phishing tests to assess the level of phishing susceptibility in your business. Comprehensive and customisable library of "known-to-work" phishing templates, updated regularly to reflect current threats. Get phishing results including your industry benchmark.

- Recreate any phishing attack included ransomware, BEC, wire fraud, CEO fraud, advanced phishing attempts.
- Phishing attacks with links, attachments and fake log in pages
- Simulate phishing attacks impersonating internal email addresses
- Avoid users tipping each other off by using burst mode which sends multiple templates in one campaign
- Phishing tests that auto-enrol user in training
- Every user interaction fully recorded for reporting
- Identify repeat offenders, high-risk departments or locations
- Identify geo-location, operating system and browser edition
- Raise staff awareness of Smishing by sending customizable phishing text messages directly to their cell phones.

### We also offer additional options

- Clients can Upload any of their existing content such as policies, courses, videos, PowerPoints, pdf and word documents on **ANY TOPIC** (not just security awareness).
- We automatically analyse all reported emails by staff to determine if they are true or false positives. If true positives are identified all copies of that email can be quarantined in order to avoid any user being tricked.

## DEMONSTRATING ROI FROM SAFETITAN SECURITY AWARENESS TRAINING

Without robust results to share, you may find yourself answering questions from business leaders about the true value of your Security Awareness Training (SAT) investment. SafeTitan allows you see the results and crucially be able to demonstrate those results with:

- Enterprise-level reporting, showing metrics and charts for phishing simulations and training, ready for management.
- Easily demonstrate ROI on your technical defences.
- Communicate the long-term value of real behavioural change and how slow nurturing today can lead to incredible organizational security in your company's future

SafeTitan makes your job easier and allows positive and informed decision making for future security training investment.

### Data Privacy

**GDPR, CCPA, Kenya Data Protection, POPI Act, and more.**

Articles 39 and 47 of GDPR require companies to raise the level of security awareness of their staff.

We've worked with clients across the globe to build security-training programs that educate their teams to support and safeguard their systems and data; and meet training requirements mandated by GDPR and other regulations.
