

ManageEngine ADManager Plus

# A comprehensive identity governance and administration (IGA) solution for enterprises.

## Highlights

 <p>Provision users across AD, Microsoft 365, Exchange, and Google Workspace</p>	 <p>Monitor AD health and mitigate risks</p>	 <p>Utilize automation policies with review-approval workflows</p>
 <p>Generate over 200 prepackaged, actionable reports</p>	 <p>Run access certification campaigns</p>	 <p>Integrate with popular SIEM, HCM, ITSM, and help desk tools</p>
 <p>Orchestrate identity lifecycle across enterprise apps</p>	 <p>Implement granular delegation and detect anomalies</p>	 <p>Manage while on-the-go with iOS and Android mobile apps</p>

## Introducing ADManager Plus

ADManager Plus is an IGA solution that helps enterprises manage identities, ensure security, and improve compliance. It's a one-stop solution that enables admins to run access certification campaigns, orchestrate the entire user life cycle across integrated applications, and gain insights into identities and their access rights with over 200 reports. With ADManager Plus, optimize your IGA operations by implementing workflows, automations, and role-based access control policies.

“

We evaluated ScriptLogic Active Administrator, Quest AD management tool and ADManager Plus to solve our day-to-day AD management & reporting needs. ADManager Plus with its high-end features and low-end cost was an obvious choice. ”

**Meraz Nasi,**

Manager of Infrastructure (ITS), Interfaith Medical Center, New York, United States.

### ADManager Plus is available in two editions:

- Standard
- Professional

#### Licensing model:

Domains (with unlimited objects) and number of help desk technicians.

**Starts at \$595**

## Supported features

- ✔ **Orchestrate identity lifecycle**  
Implement event-driven orchestration policies that seamlessly execute a sequence of tasks, such as granting or revoking access—both during user provisioning and deprovisioning—across various enterprise applications.
- ✔ **Centralized management**  
One-step user provisioning and administration of users across AD, Exchange, Microsoft 365, Google Workspace, and Skype for Business via CSV uploads and customizable templates. Seamlessly manage GPOs, shared mailboxes, and remote mailboxes, and perform migrations of users, groups, contacts, and GPOs across trusted domains in a user-friendly GUI interface.
- ✔ **Automation and workflow**  
Schedule the execution of critical AD tasks through automation. Establish multi-level workflows to validate and prioritize user requests, all while maintaining efficient SLA management. Exercise precise control over automated tasks by integrating workflows within your automations.
- ✔ **Built-in reports for deep insights**  
Gain access to a comprehensive library of over 200 pre-configured reports. Easily generate, schedule, and customize reports to align with your organization's specific requirements using intuitive filters, and export them in a variety of formats. Stay compliant with regulatory standards like SOX, GDPR, PCI DSS, HIPAA, and more.
- ✔ **Backup and recovery**  
Safeguard your data effortlessly by backing up, restoring, and archiving AD and Azure AD objects. Secure your Google Workspace assets—including mailboxes, contacts, user drives, and calendar items—with ease. Experience hassle-free recovery without having to restart your DCs.
- ✔ **Risk assessment**  
Gain insights into your AD's health and risk posture. Assess potential risk indicators and obtain a risk score for your environment based on their likelihood of occurrence and impact level. Take action on the remediation measures to manage proactively and mitigate risks.
- ✔ **Access certification**  
Sustain a secure and compliant access management system through periodic reviews of user access rights and permissions. Simplify this process by establishing access review campaigns, reducing manual tasks, and mitigating risks.
- ✔ **Integrations**  
Synergize the functionalities of ADManager Plus with third-party applications such as help desk software, IT service management (ITSM), human capital management (HCM) applications, databases, and security information and event management (SIEM) solutions. Leverage flexible REST APIs to integrate with various software and applications seamlessly, ensuring a unified approach to AD management and security.
- ✔ **Non-invasive delegation**  
Take the load off your IT administrator's shoulders without elevating technician privileges in AD. Delegate tasks to help desk technicians in AD, Microsoft 365, and Google Workspace based on roles, OUs, and groups. Also, use audit reports to identify anomalies in technician and admin actions from established norms.

## System Requirements:

**Processor:** P4 - 2.1GHz. RAM: 4GB.

**Disk space:** 5GB.

**Supported Windows OS versions:** Windows Server 2008 and above, Windows 7 and above

**Supported browsers:** Internet Explorer 10 and above, Mozilla Firefox, Google Chrome, Microsoft Edge
