

SOLARWINDS NETWORK PERFORMANCE MONITOR

Fault, Availability, Performance, and Deep Packet Inspection

SolarWinds® Network Performance Monitor (NPM) is a powerful and affordable network monitoring software that enables you to quickly detect, diagnose, and resolve network performance problems and outages.

NETWORK PERFORMANCE MONITOR AT A GLANCE

- » Speeds troubleshooting, increases service levels, and reduces downtime.
- » **NEW in v12:** Advanced network troubleshooting for on-premises, hybrid, and cloud services with critical path hop-by-hop analysis.
- » NEW in v12: Comprehensive monitoring of F5® BIG-IP® family of products.
- » Monitors and displays response time, availability, and performance of network devices.
- » Improves operational efficiency with out-of-the-box dashboards, alerts, and reports.
- » Automatically discovers network devices and typically deploys in about an hour.

FEATURES

Fault, performance and availability monitoring

Quickly detect, diagnose, and resolve network performance issues and avoid downtime with network optimization software.

Hop-by-hop analysis along critical paths

View performance, traffic, and configuration details of devices and applications that are on-premises, in the cloud, or across hybrid environments with NetPath™.

Customizable topology and dependency-aware intelligent alerts

Respond to multiple condition checks, correlated events, network topology, and device dependencies.

Dynamic wired and wireless network discovery and mapping

Automatically discover and map devices, performance metrics, link utilization, and wireless coverage.

Automated capacity forecasting, alerting, and reporting

Automatically calculate exhaustion dates using customizable thresholds based on peak and average usage.

Comprehensive monitoring of F5 BIG-IP family of products

Visualize and gain insight into the health & performance of your F5 service delivery environment.

Wireless network monitoring and management

Retrieve performance metrics for autonomous access points, wireless controllers, and clients.

Consultant and services-free deployment

Install and deploy in generally as little as an hour with out-of-the-box monitors, alerts and reports.

Customizable single-pane-of-glass network monitoring software

Customizable web-based network performance dashboards, views and charts.

End user quality of experience with Packet Capture and Analysis

Determine if changes in end user experience are caused by the application or the network.

DOWNLOAD FREE TRIAL

Fully Functional for 30 Days

Dynamic statistical network performance baselines

Dynamically calculate baseline thresholds from historical network performance data.

Hardware Health Monitoring

Monitor, alert, and report on key device metrics, including temperature, fan speed, and power supply.

Customizable performance and availability reports

Schedule and generate custom network performance reports with one of over 100 out-of-the-box templates.

Drag-and-discover network performance charts

Real-time network performance metrics with interactive charts and graphs from your network devices.

SYSTEM REQUIREMENTS

HARDWARE	MINIMUM REQUIREMENTS
CPU	Dual processor, 3.0 GHz
Memory	3 GB
Hard Drive	20 GB free disk space is recommended
SOFTWARE	MINIMUM REQUIREMENTS
OS	Windows® Server 2008 R2 SP1 Windows Server 2012 Windows Server 2012 R2
Database	SolarWinds supports Express, Standard, or Enterprise versions of the following: -SQL Server 2008, 2008 SP1, 2008 SP2, 2008 SP3, 2008 SP4 -SQL Server 2008 R2, 2008 R2 SP1, 2008 R2 SP3 -SQL Server 2012, 2012 SP1, 2012 SP2, 2012 SP3 -SQL Server 2014, 2014 SP1 -SQL Server 2016
.NET Framework	Version 4.5 Required

NOTE: The minimum server requirements listed assume default configuration. Significantly increasing the poll rate or statistic collection rate could result in additional load on the server, which may require a larger CPU or additional memory.

TRY BEFORE YOU BUY. DOWNLOAD A FREE TRIAL!

Don't just take our word for it. At SolarWinds, we believe you should try our software before you buy. That's why we offer free trials that deliver full product functionality. Simply download and install the software and take a break while Network Performance Monitor discovers your network devices. When you get back, your monitoring environment will be waiting for you—complete with out-of-the-box dashboards, alerts, reports, and more! It's just that simple!

ABOUT SOLARWINDS

SolarWinds provides powerful and affordable IT management software to customers world-wide. Focused exclusively on IT pros, we strive to eliminate the complexity in IT management software. SolarWinds delivers on this commitment with unexpected simplicity through products that are easy to find, buy, use, and maintain, while providing the power to address any IT management problem on any scale. Our solutions are rooted in our deep connection to our user base, which interacts in our online community, thwack®, to solve problems, share technology and best practices, and contribute to our product development process.
