

MailStore Server

The Standard in Email Archiving

V13

- ▶ A global standard for email archiving
- ▶ Email archiving for SMB
- ▶ Easy to install, reliable and low-maintenance

Flexible Archiving

MailStore Server allows you to archive your emails, regardless of which email system you use to store them. This guarantees your company's optimum flexibility now and in the future. No changes will be made to your email system during the archiving process and you do not need administrative access.

Integrated Storage Technology

The core of the MailStore Server consists of a fully integrated storage technology that can manage large amounts of data both efficiently and safely. It doesn't require an external database management system and is available immediately after setup is complete.

Fast Search Access

Users can access the archive using a number of methods (such as integration into Microsoft Outlook and Web Access) and quickly browse the emails using an incredibly powerful full-text search. Access via the familiar folder structure is also possible.

Compliance Features

The comprehensive technology concept of MailStore Server helps companies to meet a growing number of compliance requirements and can also assist with eDiscovery scenarios. MailStore Server archives emails in a central, complete and tamper-proof manner and helps to find emails again at a moment's notice.

MailStore Server

V13

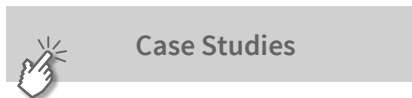

Email Archiving for SMB

Businesses can benefit from all advantages of modern, secure email archiving with MailStore Server. The software creates 1:1 copies of all emails in a central email archive to ensure the security and availability of large amounts of data over a period of years. Users can still access their email using for example Microsoft Outlook or a mobile device and search through them with the help of a powerful full-text search.

Advantages for Your Company

- Assistance with regulatory compliance
- Help with fulfilling GDPR obligations
- Fast full-text searching for emails and attachments
- Protection against data loss
- Reduce the workload of email servers
- Save up to 70% storage space
- Simplify backup and restore
- Independence of cumbersome PST files
- Elimination of mailbox quotas

Successful Operation at More Than 70,000 Companies

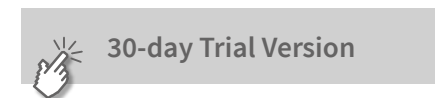

Satisfied Customers
