

Employee education tailor made to reduce Insider Risk

Code42 Instructor™ is Insider Risk reduction education that enables organizations to provide education to employees, where and when it's needed. Unlike traditional security awareness and education designed for general compliance and external threats, Code42 Instructor is employee education tailored for Insider Risk Management. Instructor focuses on what is needed to truly change user behavior and reduce Insider Risk by providing proactive organization-wide and department-level lessons, situation specific persona and technology lessons, and responsive user-specific lessons triggered by user activity.

Insider Risk reduction education designed to:

- ▶ Promote and ensure data use policy compliance
- ▶ Enable and empower a more risk-aware workforce
- ▶ Reduce accidental & negligent employee data leaks
- ▶ Measure, report and improve organization-wide Insider Risk posture

Insider Risk reduction education that is:

-  **Risk-Based**
-  **Real-Time**
-  **User-Centric**

Reduce risk to data with 4 types of lessons:

Proactive

Proactive Insider Risk lessons are compliance focused and culture minded meaning they are designed to empower employees to do the right thing and are SCORM ready to plug and play into any security awareness and training program.

Proactive lessons include:

- ▶ Insider Risk & You
- ▶ Avoiding Common Data Risks: iCloud
- ▶ Avoiding Common Data Risks: Slack
- ▶ Keeping Data Safe: Marketing
- ▶ New Insider Risk Management Program (IRM) Notification
- ▶ Sharing Files Securely: MS365 & OneDrive

Situational

Situational Insider Risk lessons are for specific users or groups of users that are in the moment, engaging and relevant to the employee lifecycle.

Situational lessons include:

- ▶ Departing Employee: Dos and Don'ts
- ▶ Departing Employee: Developer
- ▶ Employee Onboarding
- ▶ New Employee: Dos and Don'ts
- ▶ Users with Elevated Access: Avoiding Common Data Risks

Responsive

Responsive Insider Risk lessons are user-focused to provide just-in-time training, user-friendly to deliver education in helpful, bite-sized chunks, and user specific meaning they are triggered by unsafe user behavior or activity.

Responsive lessons include:

- ▶ iCloud Sync
- ▶ File Shared Broadly Through Google Drive
- ▶ Unapproved Cloud Storage: Dropbox
- ▶ Unsafe Sharing: Microsoft Teams
- ▶ Unsafe Use: Personal Email
- ▶ Use Gmail, Not Yahoo

Cybersecurity Awareness Training

Cybersecurity Awareness Training lessons support compliance and educate employees on cybersecurity fundamentals such as passwords and phishing. Add them to your learning management system as a standalone compliance training or in addition to your other security awareness lessons.

Cybersecurity Awareness lessons include:

- ▶ HIPAA
- ▶ Internet Safety & Untrusted Domains
- ▶ Working Remotely
- ▶ Passwords
- ▶ Phishing
- ▶ Policy Training
- ▶ Privacy
- ▶ Social Engineering

Available in two packages, Instructor lessons are ready-to-use but also customizable.

Instructor

- ▶ Best-in-class Insider Risk reduction training. Lessons tailored to help reduce Insider Risk proactively and responsively.

Instructor custom branded

- ▶ Custom branded Instructor lessons. Customize Instructor lessons with your company logo and information.

“The goal with Code42 Instructor is to train employees in real time. The majority of Insider Risk incidents are inadvertent, so if we can embed training and education when the risky behavior happens, it’ll go a long way toward reducing that risk over time.”

— Aaron Momin, CISO, FinancialForce
